SUBJECT INDEX

Achromobacter liquidum, immobilized, 1601
Activated sludge process, flocculation in, 739
  models for, 703, 723
  optimization of, 807
Aeration, effects on baker's yeast, 1197, 1213
  extended, nitrogen metabolism in, 1
  step, optimization of, 231
Aerosols, substrates for enzyme reactions, 551
Affinity chromatography, purification of diphtheria toxin, 925
  of β-galactosidase, 1103
Agitation (see Mixing)
Air lift fermenter, 1179
Alcaligenes faecalis, β-D-glucosidase from, 1413
Algae, in biological waste treatment, 881
  open cultivation of, 1015
Aminoacylase, immobilized, 1537
β-Amylase, immobilized, 567, 579, 1567
Amyloglucosidase, adsorption on ion-exchange resins, 1161
  binding to proteins, 1393
  immobilized on glass, 169
Anaerobic digestion, methanogenic activity in, 1459
  mixing in, 757
  temperature effects, 771
L-Asparaginase, immobilized on nylon, 119
Bacillus stearothermophilus, α-galactosidase production by, 1227
Biological waste treatment, 701, 881, 1179
  nitrogen metabolism in, 1
Biological waste treatment processes, activated sludge, 703, 723, 739, 807
  anaerobic digestion, 757, 771, 1459
  extended aeration, 1
  modeling of 703, 723, 1139
  step aeration, 231
Biomas determination, turbidometric, 475
Broths, rheology of, 61, 181
Candida lipolytica, enzyme and protein release from, 1399
Carbon dioxide, mass balance on algal cultivation, 1015
Catalase, immobilized, 413, 419, 897, 1659, 1675
Cell disintegration, by freeze-pressing, 1283
  enzyme yields from, 623
  homogenizers, 261, 371, 623, 1399
  Hughes press, 675
  ultrasound, 659
Cellulose, waste, enzymatic hydrolysis of, 1471
  microbial protein from, 869
Centrifugation, differential, virus purification, 847
Centrifuge, continuous, cabinet for, 1681
Chloroperoxidase, kinetics, 1045
Citrulline, production by immobilized cells, 1589
Commensalism, stability in, 1373
Contamination, in fermentation plants, 1005
Continuous cultivation, mixed populations on methane, 41
  model for, 827
  yeast-alcohol, 1611
Diphtheria toxin, purification of, 925
Drop-size distribution, in hydrocarbon fermentations, 1557
Enzymes, immobilized, 289, 413, 1161, 1553
  diffusion in, 909, 1081
  inactivation of, 1659, 1675
  kinetics, 77, 99, 119, 159, 315, 943, 1081, 1113, 1299, 1321, 1345
  on glass, 169, 275, 397, 1507

on membranes, 77, 345, 513, 545, 859
preparation of, 169, 275, 295, 361, 385, 397, 501, 513, 567, 579, 609, 689, 859, 897, 997, 1055, 1095, 1393, 1413, 1419, 1425, 1507, 1517, 1537, 1549, 1553, 1633
reactors for, 135, 315, 333, 345, 419, 545, 579, 1113, 1359, 1567
isolation and purification, 987, 1413, 1433
Enzyme kinetics, 551, 1045
Erythropoietin, recovery from sheep plasma, 1069
Escherichia coli, β-galactosidase from, 1633
growth rates, 933
Fermentation broths, rheology of, 61, 181
Fermentation plants, contamination in, 1005
Fermenters, air-lift, 1179
laboratory, 293, 933, 1407, 1529
tubular loop, 1261
yeast-alcohol, 1611
"Formose," microbial growth on, 209
α-Galactosidase, immobilized, flow reactor for, 135
production, 1227
β-Galactosidase, affinity chromatography of, 1103
immobilized, 397, 943, 1633
Glucoamylase, immobilized, 1517
Glucose oxidase, assay, 525
immobilized, 159, 897, 1299, 1321
β-D-Glucosidase, immobilized, 1413
Growth, kinetics, bacterial, 1545
mixed populations, 423
Growth chambers, temperature control, 863
Growth rate, *E. coli*, 933
measurement of, 531
HeLa S3, synchronous growth, 149
Hepatitis antigen, removal from blood and plasma, 593
Hydrocarbons, assimilation of, 965
Hydrocarbon fermentations, 539, 635, 863, 1399, 1557
Immunoadsorption, 593
Invertase, determination of, 697
immobilized, 501
Ion-exchange resins, enzyme adsorption on, 1161
Iron, biological oxidation of, 559
Kinetics, activated sludge processes, 703, 723, 739
anaerobic digestion, 771
bacterial growth, 1545
biological transport, 1645
enzyme reactions, 551
growth of mixed populations, 423
hydrocarbon fermentations, 635
immobilized enzymes, 77, 99, 119, 159, 315, 943, 1081, 1113, 1299, 1321, 1345
yeast death in spray drying, 1245
yeast growth, 431
Lactase, immobilized, 295, 689
Lactose, hydrolysis of, 295, 397, 689
Leucine aminopeptidase, immobilized, 275
Lignin, degradation of, 789
Liquid membranes, enzyme entrapment by, 513
Lysozyme, immobilized, 361
Methane, growth of mixed populations on, 41, 251
Microbial processes, batch, 555, 1261
kinetics, 423, 431, 485, 555, 635, 703, 723, 739, 771, 827, 1373
modeling of, 1139
ore leading, 991
using immobilized cells, 1589, 1601
Microbial protein, fibers from, 285
yeast, 1495
Microbial protein production, from alkanes, 1135, 1399
from cellulose, 869
from methane, 41
RNA reduction in, 285, 1123
Mixed cultures, growth kinetics, 423
growth on methane, 41, 251
wall growth in, 251
Mixing, in anaerobic digestion, 757
in flow systems, 1283
Models, biological waste treatment processes, 1139
continuous culture, 827
of commensalistic systems, 1373
kinetic, activated sludge process, 703, 723

hydrocarbon fermentations, 635
yeast growth, 431
Nitrate-nitrite separation, enzymatic, 513
Nucleoside monophosphates, enzymatic synthesis of, 1449
Optimization, enzyme recovery, 1433
waste treatment processes, 231, 807
Ore leaching, microbial, 991
Oxygen, dissolved, control of, 1529
Oxygen demand, for yeast grown on alkanes, 1135
Oxygen electrode, response time, 279
Peroxidase, immobilized, bactericidal effectiveness, 289
pH control, 485
Phosphotransferase, nucleoside monophosphate synthesis with, 1449
Protein solutions, concentration by freezing, 21
Pseudomonas putida, immobilized cells, 1589
Pullulanase, immobilized, 567, 579, 1567
Reactors, for immobilized enzymes, 135, 315, 333, 345, 419, 579, 1113, 1359, 1567
for microbial processes, 1179
Respiration, measurement of, 531
Rheology, fermentation broths, 61, 181
Hughes press, 675
Ribulose diphosphate carboxylase, immobilized, 1507
RNA, in microbial protein, 285, 1123
Saccharomyces cerevisiae, disruption by freeze-pressing, 1273
growth kinetics, 431, 455
RNA reduction in, 1123
Single-cell protein (see Microbial Protein)
Spirulina maxima, in waste water treatment, 881
Spray drying, death of yeast in, 1245
Starch, hydrolysis by immobilized enzymes, 545, 567, 579, 1567
Synchrony, in tissue culture, 149
Tannase, immobilized, 1095
Temperature control, in growth chambers, 863
Tissue culture, perpetual synchrony in 149
Transport, biological, kinetics of, 1645
Trypsin, immobilized, 997
Turbidimeter, fiber optic, for biomass measurement, 475
Urease, immobilized, 859, 1419
Urocanic acid, production by immobilized cells, 1601
Virus, influenza, production, 1025
production in cell suspensions, 1025
Qβ, purification, 847
Sindbis, production, 1025
vesicular stomatitis, production, 1025
Whey, enzymatic hydrolysis, 295, 397
Yeast, baker's effect of aeration on, 1197, 1213
oxidative enzymes of, 1213
death in spray drying, 1245
disruption of, 623, 1273
enzyme yields from, 623
Yeast protein, alkali and heat treatment of, 1495

ACKNOWLEDGMENT

The Editor and the Editorial Board gratefully acknowledge the contributions of the following reviewers in the preparation of this volume:

Statement of ownership, management, and circulation (Act of August 12, 1970; Section 3685, Title 39, United States Code)

1. Title of Publication: Biotechnology and Bioengineering
2. Date of filing: September 17, 1974
3. Frequency of issue: Monthly
4. Location of known office of publication: John Wiley and Sons, Inc., 605 Third Avenue, New York, New York 10016.
5. Location of the headquarters or general business offices of the publisher: John Wiley and Sons, Inc., 605 Third Avenue, New York, New York 10016
6. Names and addresses of publisher, editor, and managing editor:
   Publisher: John Wiley and Sons, Inc., 605 Third Avenue, New York, New York 10016
   Editor: Elmer L. Gaden, Jr., Department of Chemical Engineering, Columbia University, New York, New York 10027
   Managing Editor: None
7. Owner: John Wiley and Sons, Inc., 605 Third Avenue, New York, New York 10016
The following is a list of stockholders owning or holding 1% or more of John Wiley & Sons, Inc. stock as of September 12, 1974:
Cynthia W. Darby, Box 651, Bridgehampton, New York 11932; Hamilton Darby, Box 651, Bridgehampton, New York 11932; John P. Gilbert, exec. estate of Julia Wiley Gilbert, c/o Wells Fargo Bank Trust Division 37165, P.O. Box 3820, San Francisco, California 94120; Edward P. Hamilton, 605 Third Avenue, New York, New York 10016; W. Bradford Wiley & Francis Lobdell, Trustees, Elizabeth W. Hamilton Trust, 605 Third Avenue, New York, New York 10016; Edward P. Hamilton, Trustee under will of Elizabeth Wiley Hamilton, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York 10005; I. M. Kolthoff, University of Minnesota, School of Chemistry, Minneapolis, Minnesota; Eric S. Proskauer & Charles H. Lieb, Trustees, u/a by Jenny R. Proskauer, 220 Central Park South, New York, New York 10019; Francis Lobdell & William J. Seawright, Trustees, f/b/o Deborah Elizabeth Wiley, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016; Cynthia W. Darby & Julia Gilbert, Trustees, under will of Kate R. Q. Wiley, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York 10005; Francis Lobdell & William J. Seawright, Trustees, f/b/o Peter Booth Wiley, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016; Francis Lobdell & William J. Seawright, Trustees, f/b/o William Bradford Wiley II, c/o John Wiley & Sons, Inc., New York, New York 10016; Edward P. Hamilton & Cynthia Wiley Darby, Trustees, under will of William O. Wiley, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York 10005; Adele E. Windheim, 8 Dundee Road, Larchmont, New York; John H. Norris & William H. Paul, Trustees, u-a f/b/o Carmen R. Runyon, Jr., 427 Madison Avenue, New York, New York 10022; W. Bradford Wiley & E. P. Hamilton, Trustees for Edward P. Hamilton Foundation, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016; Mrs. Rosamond R. Pennywitt, 49 Bristol Place, Bay Head, New Jersey 08742; Drexel Burnham & Co., 60 Broad Street, New York, New York; Mass. State Carpenters Fund, Hermitage Bldg., 1 Militia Drive, Lexington, Massachusetts 02173; Bankers Trust Company, 16 Wall Street, New York, New York 10015; National Bank of Detroit, Woodward Avenue, Detroit, Michigan; Riggs National Bank of Washington, D.C., 1508 H. Street, N.W., Washington, D.C.; Manufacturers Hanover Trust Company, 350 Park Avenue, New York, New York 10022.
8. Known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities: None
9. For optional completion by publishers mailing at the regular rates (Section 132.121 Postal Service Manual)
39 U.S.C. 3626 provides in pertinent part: "No person who would have been entitled to mail matter under former section 4359 of this title shall mail such matter at the rates provided under this subsection unless he files annually with the Postal Service a written request for permission to mail matter at such rates." In accordance with the provisions of this statute, I hereby request permission to mail the publication named in item 1 at the reduced postage rates presently authorized by 39 U.S.C. 3626.
(Signature and title of editor, publisher, business manager, or owner) Michael Harris, Vice-President
10. Not applicable.
11. Extent and nature of Circulation

	Average no. copies each issue during preceding 12 months	Actual number of copies of single issue published nearest to filing date
A. Total no. copies printed (*Net Press Run*)	1800	1800
B. Paid circulation		
1. Sales through dealers and carriers, street vendors and counter sales	—	—
2. Mail subscriptions	1407	1407
C. Total paid circulation	1407	1407
D. Free distribution by mail, carrier or other means		
1. Samples, complimentary, and other free copies	32	32
2. Copies distributed to news agents, but not sold	—	—
E. Total distribution (*sum of C and D*)	1439	1439
F. Office use, left-over, unaccounted, spoiled after printing	361	361
G. Total (*sum of E & F—should equal net press run shown in A*)	1800	1800

(*Signature of editor, publisher, business manager, or owner*)

I certify that the statements made by me above are correct and complete. MICHAEL HARRIS

Erratum 1004

Issue No. 8, August

W. H. Bartholomew, D. E. Engstrom, N. S. Goodman, A. L. O'Toole, J. L. Shelton, and L. P. Tannen: Reduction of Contamination in an Industrial Fermentation Plant (*Biotechnology Report*) 1005

K. Lívanský and B. Prokeš: CO_2 Mass Balance in a Suspension of Algae Cultivated in the Neutral pH Region of the Suspension on an Open Cultivation Surface 1015

L. Keay and S. Schlesinger: Production of Sindbis, Influenza, and Vesicular Stomatits Viruses in Chicken Embryo and Rat Embryo Cell Suspensions 1025

C. L. Cooney and J. Hueter: Enzyme Catalysis in the Presence of Non-aqueous Solvents Using Chloroperoxidase 1045

P. R. Coulet, J. H. Julliard, and D. C. Gautheron: A Mild Method of General Use for Covalent Coupling of Enzymes to Chemically Activated Collagen 1055

C. W. Hancher, R. F. Hall, A. D. Ryon, and A. D. Kelmers: Recovery of Erythropoietin from Anemic Sheep Plasma 1069

D. L. Regan, M. D. Lilly, and P. Dunnill: Influence of Intraparticle Diffusional Limitation on the Observed Kinetics of Immobilized Enzymes and on Catalyst Design 1081

H. H. Weetall and C. C. Detar: Immobilized Tannase 1095

P. J. Robinson, M. A. Wheatley, J.-C. Janson, P. Dunnill, and M. D. Lilly: Pilot Scale Affinity Chromatography of β-Galactosidase 1103

J. C. Davis: Kinetics Studies in a Continuous Steady State Hollow Fiber Membrane Enzyme Reactor 1113

M. Lindblom and H. Mogren: Enzymatic RNA Reduction in Disintegrated Cells of *Saccharomyces cerevisiae* 1123

Communications to the Editor

M. Sobotka, A. Prokop, J. Panoš, and V. Linek: Relationship between Oxygen Demand and Extracellular Fatty Acids of Yeasts Grown on *n*-Alkanes 1135

Issue No. 9, September

W. C. Boyle and P. M. Berthouex: Biological Wastewater Treatment Model Building Fits and Misfits (*Bioengineering Report*) 1139

B. Solomon and Y. Levin: Studies on Adsorption of Amyloglucosidase on Ion-Exchange Resins 1161

L. L. Gasner: Development and Application of the Thin Channel Rectangular Air Lift Mass Transfer Reactor to Fermentation and Waste-Water Treatment Systems 1179

E. Oura: Effect of Aeration Intensity on the Biochemical Composition of Baker's Yeast. I. Factors Affecting the Type of Metabolism 1197

E. Oura: Effect of Aeration Intensity on the Biochemical Composition of Baker's Yeast. II. Activities of the Oxidative Enzymes 1213

J. Delente, J. H. Johnson, M. J. Kuo, R. J. O'Connor, and L. E. Weeks: Production of a New Thermostable Neutral α-Galactosidase from a Strain of *Bacillus stearothermophilus* 1227

H. Elizondo and T. P. Labuza: Death Kinetics of Yeast in Spray Drying 1245

T. W. F. Russell, I. J. Dunn, and H. W. Blanch: The Tubular Loop Batch Fermentor: Basic Concepts 1261

K.-E. Magnusson and L. Edebo: Estimation of the Disruption in Freeze-Pressed *Saccharomyces cerevisiae* by an Electronic Particle Counter.. 1273

D. N. Johnson and D. W. Hubbard: Mixing by Impeller Agitation in Continuous Flow Systems Containing Polysaccharide Solutions..... 1283

Issue No. 10, October

B. Atkinson and D. E. Lester: An Enzyme Rate Equation for the Overall Rate of Reaction of Gel-Immobilized Glucose Oxidase Particles under Buffered Conditions. I. Pseudo-One Substrate Conditions.. 1299

B. Atkinson and D. E. Lester: An Enzyme Rate Equation for the Overall Rate of Reaction of Gel-Immobilized Glucose Oxidase Particles under Buffered Conditions. II. Two Limiting Substrates..... 1321

J. E. Bailey and M. T. C. Chow: Immobilized Enzyme Catalysis with Reaction-Generated pH Change..... 1345

A. Emery, J. Sorenson, M. Kolarik, S. Swanson, and H. Lim: An Annular Bound-Enzyme Reactor.. 1359

P. J. Reilly: Stability of Commensalistic Systems.. 1373

Communications to the Editor

B. Solomon and Y. Levin: Studies on the Binding of Amyloglucosidase to Inert Proteins..... 1393

D. A. Whitworth: Hydrocarbon Fermentation: Protein and Enzyme Solubilization from *C. lipolytica* Using an Industrial Homogenizer... 1399

G. Donelli: An Experimental Fermenting Apparatus Designed for the Automatic Sampling of Microbial Cultures..... 1407

V. R. Srinivasan and M. W. Bumm: Isolation and Immobilization of β-D-Glucosidase from *Alcaligenes faecalis*..... 1413

R. A. Messing: A Stannous Bridge for Coupling Urease to Controlled Pore Titanium.. 1419

G. J. Bartling, S. K. Chattopadhyay, H. D. Brown, C. W. Barker, and J. K. Vincent: A Convenient New Method of Enzyme Immobilization..... 1425

Information of Contributors..... 1431

Issue No. 11, November

D. C. Augenstein, K. Thrasher, A. J. Sinskey, and D. I. C. Wang: Optimization in the Recovery of a Labile Intracellular Enzyme..... 1433

R. Marutzky, H. Peterssen-Borstel, J. Flossdorf, and M.-R. Kula: Large Scale Enzymatic Synthesis of Nucleoside-5′-Monophosphates Using a Phosphotransferase from Carrots..... 1449

L. van den Berg, C. P. Lentz, R. J. Athey, and E. A. Rooke: Assessment of Methanogenic Activity in Anaerobic Digestion: Apparatus and Method..... 1459

M. Mandels, L. Hontz, and J. Nystrom: Enzymatic Hydrolysis of Waste Cellulose 1471

M. Lindblom: The Influence of Alkali and Heat Treatment on Yeast Protein 1495

J. Shapira, C. L. Hanson, J. M. Lyding, and P. J. Reilly: Properties of Ribulose Diphosphate Carboxylase Immobilized on Porous Glass ... 1507

H. Maeda, H. Suzuki, A. Yamauchi, and A. Sakimae: Preparation of Immobilized Enzymes by *N*-Vinylpyrrolidone and the General Properties of the Glucoamylase Gel 1517

R. Fuchs and D. I. C. Wang: Simple System for Controlling Dissolved Oxygen Concentration in Laboratory Fermentors 1529

H. H. Weetall and C. C. Detar: Studies on Aminoacylase Immobilized on Porous Ceramic Carriers 1537

Communications to the Editor

M. A. Kessick: The Kinetics of Bacterial Growth 1545

M. Charles, R. W. Coughlin, T. Tedman, and K. W. Beard: Polymer–Metal Composite Supports for Immobilized Enzyme Catalysts 1549

M. Charles, R. W. Coughlin, and F. X. Hasselberger: Soluble–Insoluble Enzyme Catalysts 1553

R. K. Bajpai and A. Prokop: A New Method for Measuring Drop-Size Distribution in Hydrocarbon Fermentations 1557

Erratum 1565

Issue No. 12, December

Publisher's Note I

K. Mårtensson: Preparation of an Immobilized Two-Enzyme System, β-Amylase–Pullulanase, to an Acrylic Copolymer for the Coversion of Starch to Maltose. III. Process Kinetic Studies on Continuous Reactors 1567

K. Yamamoto, T. Sato, T. Tosa, and I. Chibata: Continuous Production of L-Citrulline by Immobilized *Pseudomonas putida* Cells 1589

K. Yamamoto, T. Sato, T. Tosa, and I. Chibata: Continuous Production of Urocanic Acid by Immobilized *Achromobacter liquidum* Cells 1601

E. Wick, K. Popper, and R. P. Graham: Performance Characteristics of Continuous Yeast–Alcohol Fermentors with no Mechanical Stirring. 1611

M. V. Wondolowski and J. H. Woychik: Characterization and Immobilization of *E. coli* (ATCC-26) β-Galactosidase 1633

O. R. Brown and J. Barton: Automated Instrument for Measuring Biological Transport Kinetics over Intervals of a few Seconds 1645

R. E. Altomare, J. Kohler, P. F. Greenfield, and J. R. Kittrel : Deactivation of Immobilized Beef Liver Catalase by Hydrogen Peroxide 1659

Communications to the Editor

R. E. ALTOMARE, P. F. GREENFIELD, and J. R. KITTRELL: Inactivation of Immobilized Fungal Catalase by Hydrogen Peroxide 1675

C. G. T. EVANS, R. HARRIS-SMITH, J. E. D. STRATTON, and J. MELLING: Design and Construction of a Ventilated Cabinet for a Continuous Flow Centrifuge 1681
